DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see the amendment, filed on September 7, 2004, with respect to claims 1-6 and 8-17 have been fully considered and are persuasive. The U.S.C. 103(a) rejections of claims 1-6 and 8-17 have been withdrawn.

Allowable Subject Matter

2. Claims 1-6 and 8-17 are allowed.
3. The following is an examiner's statement of reasons for allowance:

In regard to claims 1, 6 and 13, the prior art does not disclose the limitation that "a controller, wherein if the magnitude of said acceleration detected by said at least one acceleration sensor at the time said captured image is obtained is smaller than a predetermined value, said controller records said image data in said memory together with data on a position of said camera body that is detected by said position sensor at the time said captured image is obtained, and if the magnitude of said acceleration detected by said at least one acceleration sensor at the time said captured image is obtained is equal to or greater than said predetermined value, said controller considers said data on said position of said camera body as invalid data records said image data in said memory, and does not record said data on said position of said camera body in said memory."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
